SUMMARY

Results-driven Java Full Stack Developer with 2.5 years of experience in building high-performance Spring Boot Microservices. Proven ability to design and implement robust REST APIs and integrate third-party solutions. Skilled in Java, JavaScript, HTML, CSS, Angular, and SQL. Strong problem-solving abilities and a passion for innovation. Seeking to apply my technical skills to drive impactful projects in a dynamic organization.

SKILLS

Backend Development: Java, SpringBoot, Spring MVC, Spring Framework, Spring Data JPA, Microservices, RESTful APIs, Maven, Hibernate(JDBC), Servlet JSP, API Integration, Unit testing
Frontend Development: HTML, CSS, JavaScript, Bootstrap, Ajax, jQuery, AngularJS
Database Management & SQL Expertise : CREATE, ALTER, DROP, TRUNCATE, RENAME, INSERT, UPDATE, DELETE, Normalization, Aggregation & Grouping, COMMIT, ROLLBACK, GRANT, REVOKE, Joins, Sub-Query
Database: MySQL
Version Control: GIT
Tools: Postman, Eclipse, STS Tool, Apache NetBeans IDE, IntelliJ, Github, SQLPlus, Visual Studio Code, Notepad++

EXPERIENCE

Solution Developer
Tata Technologies
August-2022 - Present

Responsible for developing and implementing software applications-

- Implemented user-friendly web portals for clients to interact with the connected vehicle platform. Include features such as real-time tracking, vehicle diagnostics, trip history, interactive charts, maps, and graphs to represent vehicle health, usage patterns, and other relevant information.
- Collaborated with UI designers to design and implement visually appealing and intuitive user interfaces.
- Implement role-based access control to secure user authentication and authorization mechanisms to control access to the platform and ensure data privacy.
- Implemented RESTful APIs to facilitate communication between front-end and back-end components. Led a project to integrate third-party APIs, reducing data redundancy and improving data quality.
- Design and implement APIs, web services, and middleware components to facilitate seamless communication between different software systems.
- Contributed to the design, development, testing, and maintenance of software applications, resolving bugs, conducting code reviews, and ensuring system compatibility, reliability, and performance through thorough troubleshooting.
- Contributed to daily stand-up meetings to provide updates on project progress, discuss and coordinate tasks with team members.
- **Java and Spring Boot Development:** Created solutions by developing, implementing, and maintaining Java-based components and interfaces using Spring Boot, resulting in a 25% reduction in development time for new features.
- **Microservices & API Development:** Led the design and development of robust microservices by crafting RESTful APIs following the Spring Boot microservices pattern. This efficient architecture enabled the company to introduce innovative features more quickly, resulting in a significant increase in user engagement and retention.
- **Technical Leadership:** Mentored junior developers, providing guidance on technical challenges and career development opportunities, and facilitated weekly knowledge-sharing sessions to ensure team growth and maintain a high-performing development team.
- **Unit Testing and System Integration:** Led the development of system test plans, executed system integration and user acceptance testing, ensuring a 20% faster deployment cycle and reducing post-release defects by 15%.
- Gain proficiency in programming languages, frameworks, and tools used within the organization.

PROJECTS

Connected Vehicle Platform (CVP) Web Application – TTL Project
The goal of CVP project is to develop a connected vehicle platform that enables seamless communication between vehicles, infrastructure, and users. The platform should provide real-time data exchange, support intelligent decision-making, and enhance the overall driving experience.

- Contributed to meeting project milestones and deadlines, ensuring the on-time delivery of the connected vehicle platform within budget. Collaborated on the development of a management system that reduced bug-fix times by 20%.
- Assisted in maintaining and improving the company's codebase, leading to a 15% increase in efficiency. Collaborated with UI designers to create an intuitive and responsive user interface, resulting in a 20% increase in user engagement and positive feedback from both internal stakeholders and end-users.

- Designed and implemented scalable microservices architecture, leading to an increase in platform capacity and reducing latency during peak usage periods by 30%.
- Worked on bug fixes and improved system performance, resulting in a 10% increase in user satisfaction scores. Improved the existing testing processes, which reduced software defects by 25%.

VSOH Web Application – TTL Project

- Developed and implemented the **Vehicle Safety and Operational Health (VSOH)** system to monitor the safety and operational status of vehicles, focusing on key performance indicators like vehicle diagnostics, sensor data, and safety alerts.
- Integrated **Kafka stream messages** for real-time data processing and consumed data streams to store relevant information in **MySQL databases** for efficient data management and analysis.
- **Technologies Used:** HTML, CSS, Bootstrap, JavaScript and AngularJs.
- **Role:** Designed and implemented the front-end with Bootstrap, ensuring mobile responsiveness. Integrated the back-end for secure REST API processing. Achievements: Increased user engagement by 20% and decreased cart abandonment rate by 15%.

IVIDMS Web Application – TTL Training Project

The goal of CVP-IVIDMS project is to develop a connected vehicle platform that enables seamless communication between vehicles, infrastructure, and users.

- **Technologies Used:** Java, HTML, CSS, Bootstrap, JavaScript and AngularJs.
- **Role:** Designed and implemented the front-end with Bootstrap, ensuring web responsiveness. Integrated the back-end for secure REST API processing.
- **Achievements:** Designed and implemented a responsive front-end using Bootstrap, leading to a 30% improvement in user satisfaction and ease of access across various devices.

Portfolio Website (Self Project)

- Developed a professional portfolio website using HTML, CSS, and JavaScript, showcasing projects, skills, and achievements to enhance online presence and professional visibility.
- Live App Url: https://praveenj.netlify.app/

CERTIFICATIONS & ACCOMPLISHMENTS

Java Developer Level 1 & Level 2 Certification - Core Java concepts including inheritance, encapsulation, polymorphism, abstraction, exceptions, lambda expressions, collections, generics, and interfaces. Advanced skills in Git, REST API development, web frameworks, web services, Spring application basics, and Hibernate for database interaction.
Certified Java Developer - Proficient in Spring Annotations, Spring Data JPA, and microservices architecture.
Promoted to Solution Developer - Elevated from Skilled Engineer to Solution Developer based on exceptional performance in software development, problem-solving, and cross-functional collaboration.

STRENGTHS

- **Time Management and Prioritization:** Proven ability to manage multiple tasks, prioritize workload effectively, and meet project deadlines while maintaining high quality standards.
- **Teamwork and Collaboration:** Worked in a cross-functional team of Seven developers in the successful execution of a critical project on time and under budget.
- **Problem-Solving Skills:** Proven ability to analyze complex problems, identify root causes, and develop innovative solutions to overcome challenges efficiently.
- **Adaptability:** Quickly incorporated new software updates in all projects, ensuring minimal disruption to workflow and maintaining project schedules.

PASSIONS

- **Mentoring:** I enjoy contributing to the learning journey of others and fostering a spirit of continuous learning.
- **Coding:** Enjoy building and optimizing software applications, always on the lookout for new programming languages and techniques to learn.
- **Personal Development**: Continuous learning, taking courses, or exploring self-improvement books.

EDUCATION

Dayananda Sagar Academy of Technology and Management, Bangalore
Bachelor's in Computer Science and Engineering
Graduated: 2020 with a CGPA of 7.1
K J T E T Polytechnic
Diploma in Computer Science
Completed: 2016 with a CGPA of 8.9
